

SUBLAN MUSTAFA

SENIOR FULL STACK DEVELOPER | AI INTEGRATION ENGINEER | TECHNICAL LEAD

Islamabad, Pakistan | +92 321 6862614 | ma030264@gmail.com | github.com/Sublan | Sublanz.app

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 6+ years of experience architecting, building, and leading development of scalable Laravel and Vue.js applications for high-traffic platforms serving millions of users. Proven track record leading feature teams, mentoring developers, and owning system architecture decisions end to end — from database design through CI/CD deployment on AWS. Extends core full-stack expertise into AI/ML product integration, deploying open-source LLMs and ML models (ONNX Runtime, PyTorch, Ollama) for local and self-hosted inference in production web and mobile applications. Recognized for delivering clean, maintainable, and user-centric solutions on schedule in fast-paced, cross-functional environments.

CORE COMPETENCIES

Senior Full Stack Development	Technical Leadership & Mentoring	System Architecture & Design
Laravel / Livewire / Inertia.js	Vue.js / Nuxt.js / Quasar / Pinia	RESTful API Design
Microservices & Scalability	Agile / Scrum / Sprint Planning	Code Review & Best Practices
Docker / CI-CD / AWS	MongoDB / MySQL / Redis	Payment Gateway Integration
AI / ML Model Integration	ONNX Runtime / PyTorch / Ollama	Prompt Engineering & LLM Workflows
Real-Time Systems (WebSockets)	Performance Optimization	Cross-Functional Collaboration

PROFESSIONAL EXPERIENCE

- Senior Full Stack Developer & Technical Lead | Wolfiz Solutions

Apr 2024 – Present

 - Lead full-stack development of enterprise transportation management systems (including LogiNXT), directing architecture decisions across vehicle tracking, driver management, violation monitoring, and multi-tenant SaaS infrastructure serving multiple client fleets.
 - Own end-to-end delivery of real-time coaching and chat features built on WebSockets, improving driver responsiveness and reducing incident review time for fleet managers.
 - Designed a multi-tenancy architecture that reduced per-client deployment overhead and simplified onboarding of new fleet customers onto a shared platform.
 - Drive technical direction for the team — conducting code reviews, setting Laravel/Vue.js coding standards, and mentoring mid-level developers — while prototyping AI-driven driver-coaching features with open-source LLMs (Ollama, ONNX Runtime) as a self-hosted alternative to third-party AI APIs.
- Full Stack Laravel & Vue.js Developer | Ikonik Solutions

Jan 2023 – Apr 2024

 - Contributed core features to GuitarTricks.com, a large-scale platform serving millions of active users, optimizing backend queries and frontend rendering to maintain performance under high concurrent traffic during live user challenges.
 - Integrated Facebook Graph APIs for website traffic analysis, enabling the marketing team to make data-driven decisions that improved campaign targeting and engagement tracking.
 - Collaborated cross-functionally with product and QA teams in an Agile workflow, participating in sprint planning and code reviews to maintain a high-quality, low-defect release cadence.
- Laravel & Vue.js Developer | Invictus Solutions

Feb 2020 – Dec 2022

 - Built a real-time chat system using Laravel WebSockets, enabling instant messaging between users and cutting reliance on page-refresh polling for live updates.
 - Integrated four payment gateways (PayPal, JazzCash, Braintree, Stripe) into a production e-commerce platform, expanding checkout coverage across international and local payment methods.
 - Designed and developed RESTful APIs powering both the web frontend and companion mobile app, and built a complete e-commerce system from the ground up — product catalog, cart, checkout, and order management — taken from concept to production.
 - Recognized as Employee of the Quarter for consistent delivery and reliability, and awarded a Punctuality Certificate (2023).

EDUCATION

Bachelor of Science in Computer Science

Aug 2015 – Oct 2019

GC University — Major in Information Technology. Final Year Project: Multiplayer Game Development in Unity Engine.

CERTIFICATIONS & ADDITIONAL INFORMATION

Certifications: Website Development (Corvit), CCNA. | Languages: English (Professional Working Proficiency), Urdu (Native).
Awards: Employee of the Quarter and Punctuality Certificate, Invictus Solutions (2023).
